

Week 3 Day 1(Day 13): Generative AI & LLM Fundamentals

1. Google Gemini (generateContent API)

- **API Endpoint:** generativelanguage.googleapis.com
- **Status Code Received:** 200 OK

Groq (chat/completions API)

- **API Endpoint:** api.groq.com
- **Status Code Received:** 200 OK

The screenshot displays a REST client interface with a POST request to `https://api.groq.com/openai/v1/chat/completions`. The request body is a JSON object with the following structure:

```
1 {
2   "messages": [
3     {
4       "role": "user",
5       "content": "Explain the importance of low latency LLMs in one sentence."
6     }
7   ],
8   "model": "llama-3.3-70b-versatile"
9 }
```

The response status is **200 OK** with a response time of 264 ms and a body size of 1.14 KB. The response body is a JSON object:

```
1 {
2   "id": "chatmpl-8c6c1ee8-4583-4ddb-bba7-dd338d7f5f4c",
3   "object": "chat.completion",
4   "created": 1786079162,
5   "model": "llama-3.3-70b-versatile",
6   "choices": [
7     {
8       "index": 0,
9       "message": {
10        "role": "assistant",
11        "content": "Low latency Large Language Models (LLMs) are crucial for enabling real-time and interactive applications, such as voice assistants, chatbots, and virtual customer service, by providing rapid and responsive language understanding and generation capabilities."
12      },
13      "logprobs": null,
14      "finish_reason": "stop"
15    }
16  ]
17 }
```

On the right side, there is a 'New Chat' panel with a text input area containing the prompt: 'Describe what you need. Press @ for context, / for Skills.' and an 'Auto' button.
